

Auxiliaries

AK401 Degreaser

Product Description

AK401 are particularly well suited for removing grease, oils, wax and silicone prior to the application of Dobte primer and for the pre-treatment of plastic surfaces. No stimulation to skin.

Pre-treatment

Do not use the degreaser on solvent-sensitive or thermoplastic substrates.

Mixing Ratio

This product is ready for use

Soak a clean and dry lint-free cloth with AK401

Degrease small areas of approximately 0.5 m² of the surface to be painted and wipe these areas immediately afterwards with a dry cloth of the same quality.

Application

AK401 should not dry on the surface being treated.

Attention:

Some 1K primers/basecoats may suffer surface etching from the use of AK401. In this case, ensure a good flash-off of the substrate before going on with the repair so that no solvents will be trapped in the new paint system. In extreme cases, remove the 1K primer/basecoat before applying the new paint system, or flat with P800-1000 grade sandpaper for refining refinish.
